## DOES THE CITY COUNCIL DO THE CRAWFISH ACT?

Meet In Called Session and Say Act of Marshal In Holding Up Coal Train Was Done Without Previous Understanding,

But When Marshal Dellaven Confronts Them With Cold Facts They Reconsider and Strike Out Resolutions Condemning Him and Content Themselves With Giving the Lie to the Newspaper Reports.

#### A VERBATIM REPORT OF THURSDAY NIGHT'S PROCEEDINGS.

ouncil is peculiar.

Stand up, little four-year-old Willie. ake your finger out of your mouth and tell us the meaning of "Go ahead." The City Council of Cloverport is "ur the air" at the newspaper reports e train of coal in this city by Marshal D. DeHaven on Tuesday of last week a called meeting of the City on last Thursday night they resolved thusly

"That we as a Council and indi-vidually, condemn in severest terms the false and foolish act of the newspaper reporter who caused such reports to be published and circulated. "We brand as false in whole and in part each and every statement any time passed drastic or any resolution or ordinance in any way pertaining to the fuel situation or the remedy therefor."

Pretty warm, eh? But, ger the City Council, when Mr. DeHave went before you on Monday, Feb. 4 night of the regular monthly meet of the Council and stated that the oal dituation was serious and that he ould use strenuous methods, if neces-ary, to get it if the Council would back im up, did not you say "Go ahead, e are behind you?" If you did not take that statement why did you use to be stricken from the above resolutions when it came to a vote, sections to the effect that "the Council deplores the action of the City Marshal by taking it upon himself without any authority from this body in holding up a train of coal," and expressing your disapproval of his act?

At the meeting of the City Council, the two sections referring to the Maroversation is alleged to have taken olace, were Mayor James G. Harris and S. H. McCracken, Joseph Fitch, Charlie Hook and J. T. O'Connell. The absent members were I. A. Barry

Silence reigned for several minute Apparently the City Marshal had thrown a "bomb shell" into the camp thrown a "bomb of the enemy. The quietness of graveyard prevailed. Finall Mayor aroused himself and said: Finally.

Well, gentlemen, what shall we with the resolutions?

After an "I move that they be adopted" was put before the body Marshal DeHaven arose and said:

Is not some significance attached to the fact-that the resolutions condemn-ing the City Marshal and the newspa-pers were presented by Councilman Barry, who was absent when this con

The City Council is certainly in an ncomfortable position. But, gentle men, be strong enough to come out nly and say you erred. So far as the newspapers are concerned the City Council of this town is "small potatoes and few in a hill."

The banquet given on last Fridaye evening in the Masonic Lodge roms by the Cloverport Chapter No. 99, R. A. M., was a notable event.

The summptuous repast that was served was done to a "Queen's taste" and those who participated in the evening's repeats say it surpassed all other events in lodge circles.

The occasion was the initiation of a class of three candidates for the degree of Royal Arch Masons, and consumed the greater portion of the afternoon and not until the midnight hour had been chimed away did the banqueters depart for their homes.

The candidates who were exalted to the august degree of Royal Arch Mason were Rev. Edwin Graves, Irvington: C.W. Hamman and J. Byrne Severs, Cloverport.

### **GREATEST SCARCITY** OF COAL

In History of Henderson Route Has Been Experienced in Last Few Weeks.

Never in the history of the Henderson, Route has the road suffered so from the want of coal as it has in the few weeks past, says General Superintendent A. M. McCracken. Three coal mines are on this road, but during the flood only one was operating. The road was compelled to get its coal from this, but Mr. Cox gave explicit instructions that, in view of the scarcity of fuel all along the route, no more coal than was absolutely necessary should be held by the road. So great a scarcity prevailed at one time that coal had to be taken out of the tender of one engine and put into that of the other up at Irvington in order to get the trains over the road. The-damage to the road-bed caused by the flood and the want of a sufficient amount of coal have worked hardships on the Henderson Route since the beginning of 1907.

Easton, Pa., is one of the cities that, having tried municipal ownership of lighting plants, have found it wanting. In a recent message to the city conneils Mayor March said that, although he is a believer in the theory of city ownership, nevertheless he would "prefer to hand over the city lighting to private corporations rather than see the case in the last six montas."

Continuing, he characterized this as diagnostic form the police point of view" and unbearable from the citizen's, adding that if the city continues to sperate the plant it "must be addingerous from the police point of view" and unbearable from the citizen's, adding that if the city continues to sperate the plant it "must be a continuing to the continuing that it is not to the continuing the continuing

remains.

Nothing has ever been charged up for depreciation, but the people were told that this was unnecessary, as the plant was being kept in good repair. Fifty thousand dollars was spent in "patching up" the plant, but the statement that it was kept in good order is now proved untrue, and so is the statement that the cost was less than a private corporation would have charged for the same service, though many people believed both statements for a time.

THE OUTRAGE OF LAST TUESDAY

It is useless to recite all of the details incident to the outrage of st Tuesday, the hold-up for two hours and thirty-five minutes of a Henderson Route freight train. What concerns us most here is the injustice the mayor and conncil of this town have inflicted upon the Henderson Route and the newspapers. When a body of men elected by a people to govern a city become so domineering as to ride roughshod over the best friend Cloverport has ever had—that is the Her derson Route-it is high time these men should be made to regret in a material way their action.

It is a plain fact, though not on the city records, that the council tlemen, after seeing their mistake, and some of them through fear of Stallman, Myrule Scott, Messrs. Morgan a sweeping doniel of cover and stall a Hirch. did authorize the city marshal to hold up that train. But, these geneeping denial of every newspaper report published concerning the incident: call the man who wrote the articles a liar; try to exonerate themselves from all blame and walk out of the mess as though they had never ordered a train hold-up. The mayor and the city council have officially called the News and other papers throughout the State town. It matters little to the newspapers what the council of this village may have to say about them. The council appears to the newspapers as a very small pebble on a very large beach. The council as displayed a bad spirit in the whole affair, and as a result Cloverport will suffer.

A man named Weyhausser, of the Northwest, looms up now as the richest man in the world. His wealth is in the form of timber land and, it is said, exceeds by far that of the Kerosene King.

Reports from Irvington say that the many recent marriages have exhausted her supply of young men; that there still remains in camp a regiment of beautiful and charming young ladies and that the Town Board is seriously considering ways and means of inducing young men to come and pitch camp in the thriving little city.

England's wealth, according to the London Express, is increasing at the rate of \$7,000,000 a week. That is less than one-seventh of the rate of the increase of wealth in the South. The increase in the true value of Southern wealth in the past 12 months was \$2,600,000,000, or about \$7,300,000 for every day in the year, including Sundays and holidays. Not only is the speed of increase in the South so much greater than that in England, but the South possesses resources, agricultural and mineral, that make certain in the future even a much greater rate of increase that England. No wonder the London Express bemoans the fact that England cannot keep the pace we have set—Manufacturers' Record. set. -- Manufacturers' Record

#### SUCCESS TO THE SCHOOL BOYS.

Cheer the school boys on! Say a word of encouragement to the ung fellows who day after day climb the hill and do their sums. A young fellows who day after day climb the hill and do their sums. A small handful of boys in the High School now when it should be crowded. Boys at the High School age are at the money-making age and every day they spend in school costs them the seventy-five cents or dollar they could have made at work. This is why it takes encouragement and all the cheering old folks can give them to keep the boys in school. The pay envelope looks much more interesting to the boy of sixteen than does his Algebra or his Latin. But if we are to have a well governed town—a town our posterity will be proud of—our boys and girls of today should climb the hill and do their sums.

#### THE COUNCIL'S ANNUAL REPORT.

It is a matter of much concern and vital interest to every citizen of this town as to why the council has never made public through some newspaper its report for the year 1906. The custom has been

some newspaper its report for the year 1906. The custom has been to publish this report about January 1, in accordance with the law. Ordinance No. 8, Section 6, under head "Duties of City Clerk" reads: "He shall keep a correct account between the city and its officers, and require all officers to make monthly or quarterly settlements, as may be required by the charter or ordinances. He shall make quarterly and annual reports in writing to the council showing in a full and detailed statement all receipts and expenditures of the city and the amount remaining in the treasury, which reports, when approved by the council, shall be spread at large upon the records; and he shall caused to be published annually a full statement of the financial affairs of the city."

The city's money for 1905 may have been exceeded in the post.

of the city. The city's money for 1906 may have been expended in the most judicious way, but the public has no record of it handy. As it now is one would have to go to the clerk's notes and figure it up for himself. The News cares nothing as to whether or no it is given the report to publish, but we do insist that the report should be forthcoming at an

The origin of the name Fife is not known. One historian tries to show that it comes from the Celic word veach, a Pict, and means that the district was inhabited by Picts, but that rick was inhabited by Picts, but that specially the home of any of the Pictish nations. The tradition that finds greatest favor is related by a monk, who states that the first known possessor of the district which has since grown into the kingdom of Fife was one Fifus Duffus, a famous chieftain whose date is lost in the mists of antiquity.

## Heart Weakness

The action of the heart depends upon the heart nerves and muscles. When from any cause they become weak or exhausted, and fail to furnish sufficient power, the heart flutters, palpitates, skips beats; and in its effort to keep up its work, causes pain and distress, such as smothering spells, short breath, fainting, pain around heart, arm and shoulders. The circulation is impeded, and the entire system suffers from lack of nourishment.

#### A Letter Once a Year

A Letter Once a Year.

In these busy days letter-writing is an almost forgotten art. The telephone and the telegraph play such important parts in the sending of messages and the transmission of news that they take the places of the social call and the family letter.

Yet there are dear, far-away friends and relatives from whom one would like to hear once in a while and with whom one would like to hear once in a while and with whom one would like to exchange occasional greetings.

An efficient way to accomplish this object is to establish the custom of exchanging letters once a year at a specified time.

Three women of my acquaintance,

they have never lost interest in each other.

Under such an arrangement there are no awkward breaks in the correspond-ence, no excuses to be made for not writing sooner nor oftener, and no question arises as to whose turn it is to write.—New Idea Magazine.
